• Materiali

Decowall

Malta plastica impermeabile, traspirante, fornita in vari colori, di ottima aderenza, per il rivestimento di facciate esterne e interne.
Impermeable transpiring mortar provided in various colours of excellent adherence for the revetment of external and internal facades.

Stone polymer

È un polimero acrilico in soluzione acquosa che serve come primer d'ancoraggio, su superfici in cemento, per il rivestimento decowall.
It is a acrylic polymer in aqueous solution that can be used as primer of anchorage on surfaces in cement for the Decowall covering.

Distaccante liquido Liquid release

È un prodotto liquido pronto all'uso, trasparente, che forma una membrana divisoria tra gli stampi e la superficie da stampare.
It is a ready to use liquid product, transparent that forms a separating film between the mats and the surface to be stamped.

Decotint

Prodotto impermeabilizzante, colorante e protettivo da usare sul rivestimento in DECOWALL.
Disponibile in 9 colori.
Waterproofing, protective and coloring product, to be used on the DECOWALL covering.
Available in 9 colours.
