

LIQUID RELEASE

DESCRIPTION

STONE LIQUID RELEASE is a blend of evaporating, residue free release agents for use in the stamping process to allow the clean release of texture tools from the concrete or overlay surface.

DIRECTIONS FOR USE

1) STONE SYSTEM – stamped concrete

After the concrete has been colored and is ready to be stamped, using a pump sprayer apply LIQUID RELEASE over the surface of stamping mats and on the surface to be stamped. Stamping must be carried out immediately before the RELEASE evaporates. Do not get too far ahead with the stamping as the RELEASE will evaporate and a second application may be needed. Stamp as usual, and if you see any mistakes as you stamp, you can re-trowel and re-stamp the area if needed. Apply freely and as much as you need.

2) STONE OVERLAY SYSTEM – polymer overlay

After polymer overlay is set (STONE OVERLAY SYSTEM), with a pump sprayer apply the LIQUID RELEASE over the surface of stamping mats and on the surface to be stamped and proceed as step 1)

3) DECOWALL – stamped covering

After setting the DECOWALL on the vertical surface to be stamped, using a pump sprayer apply the LIQUID RELEASE only over the stamping mats surface and then proceed as step 1) and 2)

PRECAUTIONS

Wear gloves and goggles while using. Do not allow to get into eyes. Keep out reach of children.

COVERAGE

75 to 90 sq.m per 20 litres container.

QUALITY

We hereby certify that this product is prepared in accordance with the international standards, is continuously tested in appropriate laboratories and checked prior any shipment; it is therefore a “GOOD QUALITY” Product.

IMPORTANT:

What's in this data sheet is based on best knowledge derived from practical experience and laboratory. This document cancels and replaces the previous ones. The data can be modified at any time. The customer has the responsibility to verify that the product is suitable for the application they want to perform. The manufacturer assumes no responsibility for the results of incorrect applications. It is strongly recommended to test the product on a small area before application. The product is for professional use. The International Stone regularly organizes training courses for its customers who request it. Those who use these products without being entitled do so at their own risk.
